INTRODUCTION

We are a Turkish company has been specialized marble and travertine tile,split-face,ledger panel,stone mosaic and also glass mosaic.We offer and provide our products worldwide and FOB basis but can also guide you to the best offers in terms of reliability, time frame and price. We can offer you different products at competitive price, with high quality.

Mirmer Doğaltaş has been continuing to work to become one of the leader companies in the sector offering qualified and fast services for its customers with its expert team. Our company which always gives priority to the customers and their demands has been carrying on necessary research and development activities. Natural Stone

is uniquely rare with its moving variation in each piece of stone. No two pieces are the same, giving your home a one and only. Exquisite does not mean more expensive as natural stone can be competitive in cost with some brick paver prices, manufactured countertop and cultured marble. The quality, however, can not be compared. So please stop by during this exhilarating season and see how the beauty of Natural Stone - travertine, granite, marble and glass mosaics can transform your home. Mirmer Natural Stones is an expert at taking once what was merely a house and turning it into your personal paradise.

Mirmer Natural Stones is open Monday through Friday 9 AM to 5 PM and Saturday 9 AM to 2:00 PM. Sunday and evening hours are welcomed by ap-

CLASSIC LIGHT
TRAVERTINE
 (Cross cut)

Light travertine is a stone belonging to Denizli which has first class quality and generally has cream and white colors in the surface. 99% of the travertine which you see online or displayed throughout retail locations such as flooring companies, pool builders, home improvement companies etc. is by default cross cut. This refers to the default way of cutting the travertine blocks which are harvested from the quarry.

CLASSIC LIGHT
TRAVERTINE
(VEIN CUT)

In order to produce vein cut travertine, the travertine blocks are rotated and the cuts take place across the vein. Think of it as cutting a tree. You can cut a tree vertically or horizontally. If you cut it vertically, the veins come out, same with Travertine.

WALNUT
TRAVERTINE
 (Cross cut)

Walnut Travertine is widely used outdoors and occasionally indoors. Unfilled Travertine has natural holes in the surface adding texture to the finish. Some clients instruct the layer to fill in some of the larger holes at the time of grouting. The edges of

the tiles have been tumbled giving a time worn, rustic appearance. 'Walnut' Travertine has darker brown tones offering a medium and darker selection
